Subject: Hunters Pt Community Open House re Tetra Tech Radiation 1/31

On January 31, 201 community members attended a Navy Community Open House at the Hunters Point Naval Shipyard about Tetra Tech EC, Inc.'s falsification of radiological data. The Navy reported that after finding significant signs of falsification through data evaluation, it concluded that all Tetra Tech EC, Inc., data is unreliable, and all locations need to be resampled. This announcement received significant press coverage. The development will be delayed significantly. Greenaction hosted a press conference immediately before the Open House. They also protested EPA's award of an \$85 million contract to Tetra Tech, Inc., the parent company, for radiological testing at Navajo Nation Abandoned Uranium Mines.

Below are links to some of the press coverage:
